SKILLS

- Data Analysis: Python, Pandas, NumPy, Scikit-learn
- Languages: C++, Java, Python, SQL
- Technical Skills: Measurement Analysis, System Evaluation, Statistical Modeling, Data Extraction
- Documentation: Technical Reporting, Improvement Proposals, API Documentation
- Core CS: Operating Systems, Data Structures, Computer Networks, DBMS
- Tools: Git, GitHub, MySQL, FastAPI, Postman, REST APIs

EXPERIENCE

Backend Developer — Student Organization (IITM Internware)

- Collected and analyzed backend system data for an internship platform serving 7000+ users to ensure stability.
- Evaluated system performance and designed RESTful APIs to improve data flow efficiency and scalability.
- Conducted technical assessments for large-scale events, providing backend solutions and performance reports.
- Identified system bottlenecks and implemented optimization proposals to improve reliability and uptime.
- Collaborated with cross-functional teams to ensure smooth project delivery and system maintenance.

PROJECTS

Resume-Job Description Matcher

- Built an analytical system to measure the relevance between resumes and job descriptions using semantic similarity.
- Utilized Python and NLP techniques to collect, analyze, and process text data for match scoring.
- Computed cosine similarity and extracted key data points to identify missing technical requirements.
- Developed an automated system to generate actionable reports and alignment recommendations.
- Integrated a FastAPI backend with a React frontend to deliver real-time measurement results.

Real-Time Chat Application

- Designed a structured communication system with efficient data handling and message persistence.
- Implemented real-time tracking and bidirectional data flow using Socket.IO.
- Managed user authentication and security protocols to ensure data integrity.
- Built a modular architecture focusing on system scalability and responsive interface design.
- Utilized MongoDB for structured data storage and efficient retrieval of information.

EDUCATION

Master of Computer Applications (MCA) 2025 – 2027

University of Hyderabad

Bachelor of Computer Applications (BCA) 2022 – 2025

Guru Gobind Singh Indraprastha University
